Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the invention relates to a process for propylene oxide comprising the steps set forth in claim 13 (now 1). The closest prior art of Pujado et al., US 5,599,956 A, discloses a similar process wherein hydrogen peroxide is made by reaction of hydrogen and oxygen but, in the instant process hydrogen peroxide is made by reaction of propane, hydrogen and oxygen. Applicant asserts that the presence of propane in the making of H_2O_2 allows for reduced amount of oxygen (below the explosive limit) to be used.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
